- File zrouter.ports.mk.diff added

you need to have xdev mips installed.

/usr/src# make xdev XDEV=mips XDEV_ARCH=mips.

you also need to add these two lines to bsd.ports.mk (I will submit this to the -current mailing list)

```
CONFIGURE_HOST?=    ${TARGET_ARCH}-portbld-freebsd${OSREL}
CONFIGURE_HOST:=     ${CONFIGURE_HOST:S/^/--host=/}
```

between the CONFIGURE_TARGET:= \${CONFIGURE_TARGET:S/--build=/} and CONFIGURE_LOG lines.

I did make other changes to bsd.ports.mk but i don't believe they are required here. Let me know if it seems there is something missing.
