#### #6 - 11/02/2012 02:42 AM - Michael Vale

- File *zrouter.ports.mk.diff* added

you need to have *xdev mips* installed.

```
/usr/src# make xdev XDEV=mips XDEV_ARCH=mips.
```

you also need to add these two lines to *bsd.ports.mk* (I will submit this to the -current mailing list)

```
CONFIGURE_HOST?=    ${TARGET_ARCH}-portbld-freebsd${OSREL}  
CONFIGURE_HOST:=    ${CONFIGURE_HOST:S/^/--host=}
```

```
between the CONFIGURE_TARGET:=    ${CONFIGURE_TARGET:S/--build=//} and CONFIGURE_LOG lines.
```

I did make other changes to *bsd.ports.mk* but i don't believe they are required here. Let me know if it seems there is something missing.
